

Video Optimization SEO Services Update | Optimized Video Increases Exposure in Google Yahoo MSN Search Engines.

Blended Search Video SEO -

A Quick and Seamless Way of Securing New Top Ten Rankings in Google Search Results.

Video Optimization is having a huge impact in the organic search results of Google, Yahoo and the major search engines.

Video SEO services that result in optimizing videos of products and services is quickly becoming one of the fastest methods of securing a top ten organic ranking in the Google search results.

Google, Yahoo, and MSN have all confirmed that blended search the mechanism that compiles videos, images, news stories, maps, and other types of search results alongside their traditional search results, is one mechanism that 'dresses up' and 'fills out' their results pages.

Video seo services and optimizing the video content of websites greatly helps increase website exposure in the Google search results.

Video Optimization and Video SEO is a compilation of many specific steps including:

- Optimizing video filenames by using the keyword phrases that best correspond with the contents of the video.
- Writing keyword inclusive text captions on the video
- Optimizing the backlinks of the file.
- Creating a video library that allows both spiders and users to locate video files.
- Uploading Optimized Videos on YouTube and popular social networking video portals.
- Video SEO and optimizing video can secure new, and additional page one, top ten keyword positions in Google, Yahoo, and MSN.

Recently, Forrester Research conducted a study to determine more about the influence optimized video, video SEO and the power of video optimization in Google and the major search engines. Using some Google Trends lists of popular keyword searches Forrester determined that optimized video clips were included in 40% of the top 10 search results.
